LinkedIn Groups

Group: American Society of Civil Engineers (ASCE)
Subject: Announcement from American Society of Civil Engineers (ASCE)

Dear Members,

Our group is one of the fastest growing professional groups on LinkedIn related to the civil engineering/infrastructure industry. Thanks to its members, our group has been commended by the LinkedIn team for its professionalism. Since it started in July 2008, the membership has grown to more than 12,000. The ASCE Group has been strictly moderated to maintain its professional integrity. As moderators of this group, we are thankful to all its members for making this group active and lively by posting discussions but keeping them within the strict ASCE posting guidelines and rules. Your valuable suggestions and comments (positive or negative) are always welcome. ASCE's vision is to have engineers positioned as global leaders who strive toward building a better quality of life. One of the goals of our group is to spread the message of ASCE by reaching out to engineers all over the world and to help ASCE to achieve its vision.

To help its members and make the group attractive to all involved in the building industry, we have added two additional tabs: JOBS for posting job opportunities and PROMOTIONS for posting discussions related to products and services related to civil engineering. Please note that postings under these tabs also have to meet the ASCE social media posting guidelines. Another new feature, recently added by LinkedIn, is the option for members to "like" or "flag" content. We encourage you to get involved – show us you "like" certain discussions or if you find any discussion irrelevant, offensive, or inappropriate, feel free to flag it as "inappropriate" so that the moderators can take appropriate action.

Thank you for being a responsible member of this group.

Moideen Mathari, P.E, John Marston, and Audrey Caldwell
[Moderators]
